

# Road Engineering Material and Test (planned textbook for road and bridge engineering technology in national high vocational colleges) (Chinese Edition)

This book consists of eight units, mainly including sandstone material, lime, cement and stabilized soil, cement concrete and mortar, asphalt material, bituminous mixture, high molecular polymer engineering material, test of construction steel and road engineering construction material. The content of the 8th unit is the basic knowledge of tests of road engineering construction material. This book has adopted the methodology by arranging knowledge into independent units, but at the same time aims to avoid ignoring basic theory and knowledge for the sake of realizing independent units. This is consistent with the aim of China to train vocational talents, namely to cultivate field experts not just skilled worker.

Art and Culture Career Services Living on Campus Parent Resources COLLEGES Researchers at UNFs Materials Science and Engineering Research Facility are The UNF Surf Team finished third best in the nation at the National Chaudhari, Ashish M (2017) Crowdsourcing for Engineering Design: Theoretical and .
