

# Tcp/Ip Networking: A Guide to the IBM Environment (Mcgraw-Hill Series on Computer Communications)

This book provides complete coverage of TCP/IP networking architecture as it applies to IBM's five major operating systems: MVS, VM, AS/400, RS/6000, and OS/2. Moving from theoretical to very practical issues, the guide covers the full spectrum of TCP/IP support relevant to IBM's distributed processing strategy.
