

Waterborne and Solvent Based Surface Coatings Resins and Their Applications: Alkyds v. 6 (Wiley/SITA Series in Surface Coatings Technology)

This series seeks to publish practical, applications orientated books designed for professional chemists employed in the paints and coatings industry, and reflecting technological developments, environmental concerns and increasing demand for higher volume production in emerging markets. The books in the series should provide insights into industrial methods which have traditionally been trade secrets. Each book in this series has been prepared for paint and ink technologists involved with specific product-related technical areas. Each aspect of the technology is reviewed by a team of senior practising chemists within the UK synthetic resins, paint, printing ink and coatings industries, with the emphasis on practical formulations. This volume features: solvent and waterborne chemistry; technology and formulations for industrial finished; marine and vehicle anti-corrosive systems; primers; road markings; and inks.

Items 10 - 15 2.2.6. Formulation of stoving enamels based on amino resins 139 . Water-borne paints and coatings that dry/cure at ambient level of organic solvents that may be emitted during paint application. Wiley/Sita Series in Surface Coatings Technology, Volume 5, Chapter 1 (1998) p. 52-56. Waterborne and Solvent Based Surface Coatings Resins and Their Applications Acrylics v. 1 by P. Lam, P.
