

First Workshop on Speciality Optical Fibers and Their Applications (AIP Conference Proceedings / Atomic, Molecular, Chemical Physics)

All papers have been peer-reviewed. WSOF2008 has been planned as an unprecedented forum for the specialty optical fiber community, in which researchers could meet and discuss new research developments and directions. The need for such a forum relates to the recently experienced revival of the fiber optics research, which was triggered by the demonstration of fibers based on innovative structures and/or materials. These advances enabled the realization of waveguides with unprecedented characteristics and opened up new research and application areas. This volume compiles papers presented at that event.

First Workshop on Speciality Optical Fibers and Their Applications (AIP Conference Proceedings / Atomic, Molecular, Chemical Physics). American Inst. of Physics, 2008-10-16. Paperback. Good.
