

# Systems Research in Health Care, Biocybernetics and Ecology: Proceedings of the International Congress on Applied Systems Research and Cybernetics: v. 4

Applied Systems and Cybernetics, Volume IV: Systems Research in Health Care, Biocybernetics and Ecology documents the proceedings of the International Congress on Applied Systems Research and Cybernetics. This volume compiles papers that present several concepts of health care and reflect thinking in this field. This book introduces various health care systems and models, and then tackles some issues on managing the long-term health care facility. A special information system for public health is also described in this volume. This text will be invaluable to those interested in systems research and its applications to a variety of fields, including health care.

Systems Research in Health Care, Biocybernetics and Ecology. Proceedings of the International Congress on Applied Systems Research and Cybernetics. 1981 For most agricultural systems in general and pest ecosystems in particular, these are not readily available.
