

ISO 15214:1998, Microbiology of food and animal feeding stuffs -- Horizontal method for the enumeration of mesophilic lactic acid bacteria -- Colony-count technique at 30 degrees C

This International Standard specifies a horizontal method for the enumeration of viable mesophilic lactic acid bacteria by counting the colonies growing in a solid medium after incubation at 30 °C for 3 days. Subject to the limitations discussed in the introduction and in the note above, this International Standard is applicable to products intended for human consumption or animal foodstuffs. This title may contain less than 24 pages of technical content.

Results 17 - 30 of 30 ISO 17604:2003, Microbiology of food and animal feeding stuffs -- Carcass sampling stuffs -- Horizontal method for the detection and enumeration of ISO 15214:1998, Microbiology of food and animal feeding stuffs -- Horizontal method lactic acid bacteria -- Colony-count technique at 30 degrees C. Microbiology of food and animal feeding stuffs -- Horizontal method for the for the enumeration of microorganisms -- Part 1: Colony count at 30 degrees C by the .. of mesophilic lactic acid bacteria -- Colony-count technique at 30 degrees C. Industry guidelines of quality control for Microbial Food Cultures used in .. Several methods for dilution can be used (see ISO 6887-1 and ISO 6887-2). . enumeration of mesophilic lactic acid bacteria colony count technique at 30 degrees C. Microbiology of food and animal feeding stuffs -- horizontal method for the. Microbiology of food and animal feeding stuffs -- Horizontal method for the for the enumeration of microorganisms -- Part 1: Colony count at 30 degrees C by the .. of mesophilic lactic acid bacteria -- Colony-count technique at 30 degrees C. Microbiology of food and animal feeding stuffs -- Horizontal method for the for the enumeration of microorganisms -- Part 1: Colony count at 30 degrees C by the .. of mesophilic lactic acid bacteria -- Colony-count technique at 30 degrees C.
