

# Multidimensional Signal, Image, and Video Processing and Coding, Second Edition

This book gives a concise introduction to both image and video processing, providing a balanced coverage between theory, applications and standards. It gives an introduction to both 2-D and 3-D signal processing theory, supported by an introduction to random processes and some essential results from information theory, providing the necessary foundation for a full understanding of the image and video processing concepts that follow. A significant new feature is the explanation of practical network coding methods for image and video transmission. There is also coverage of new approaches such as: super-resolution methods, non-local processing, and directional transforms. This book also has on-line support that contains many short MATLAB programs that complement examples and exercises on multidimensional signal, image, and video processing. There are numerous short video clips showing applications in video processing and coding, plus a copy of the vidview video player for playing .yuv video files on a Windows PC and an illustration of the effect of packet loss on H.264/AVC coded bitstreams. New to this edition: New appendices on random processes, information theory New coverage of image analysis edge detection, linking, clustering, and segmentation Expanded coverage on image sensing and perception, including color spaces. Now summarizes the new MPEG coding standards: scalable video coding (SVC) and multiview video coding (MVC), in addition to coverage of H.264/AVC. Updated video processing material including new example on scalable video coding and more material on object- and region-based video coding. More on video coding for networks including practical network coding (PNC), highlighting the significant advantages of PNC for both video downloading and streaming. New coverage of super-resolution methods for

image and video. Only R&D level tutorial that gives an integrated treatment of image and video processing - topics that are interconnected. New chapters on introductory random processes, information theory, and image enhancement and analysis. Coverage and discussion of the latest standards in video coding: H.264/AVC and the new scalable video standard (SVC)

Multidimensional Signal, Image, and Video Processing and Coding, 2e The revised second edition contains new appendices on random processes, new - 16 sec Watch Download PDF Multidimensional Signal Image and Video Processing and Coding Multidimensional Signal, Image, and Video Processing and Coding, Second Edition New to this edition: New appendices on random processes, information Multidimensional signal, image, and video processing and coding / John W. this second edition, we have broadened our coverage by adding introductory Multidimensional Signal, Image, and Video Processing and Coding ) [Author: John W. Woods] [Aug-2011] on . \*FREE\* shipping on qualifying Video Processing and Coding online by John W. Woods or download. We own. Multidimensional Signal, Image, and Video Processing and Coding doc, ePub, DjVu, PDF, txt forms. We will be . Brain Mapping: The Methods, Second Edition. The online version of Multidimensional Signal, Image, and Video Processing and Coding by John W. Woods on , the (Second Edition). Read Multidimensional Signal, Image, and Video Processing and Coding book processes and information theory, though this second edition introduces them. Purchase Multidimensional Signal, Image, and Video Processing and Coding - 2nd Edition. Print Book & E-Book. ISBN 9780123814203, 9780123814210. Multidimensional Signal, Image, and Video Processing and Coding, Second Edition [John W. Woods] on . \*FREE\* shipping on qualifying offers. Multidimensional Signal, Image, and Video Processing and Coding 2nd . processes and information theory, though this second edition introduces them. - 30 sec Watch PDF Multidimensional Signal, Image, and Video Processing and Coding, Second - 15 sec Download [PDF] Multidimensional Signal, Image, and Video Processing and Coding, Second Multidimensional signal, image, and video processing and coding / John W.
