

Influences of Forest and Rangeland Management on Salmonid Fishes and Their Habitats (Special Publication (American Fisheries Society))

Special Publication 19 Thorough reviews of the ways forestry, grazing, mining, and recreation affect salmonid resources, and of the best management practices to mitigate those effects. Emphasis is on western North America but the principles are broadly relevant elsewhere. This book is intended for: resource scientists, resource managers, fishery biologists, conservationists, fishery, forest and other natural resource management students.
