

Innovative Processing and Synthesis of Ceramics, Glasses and Composites IX: Proceedings of the 107th Annual Meeting of The American Ceramic Society, ... Volume 177 (Ceramic Transactions Series)

This proceedings includes papers presented at the Innovative Processing and Synthesis of Ceramics, Glasses and Composites symposium. Topics include powders, films, coatings, fibers, composites, and functionally graded materials; sol-gel, polymer precursor, and soft chemistry techniques; novel processing and microstructure-property relationships; reaction forming, combustion synthesis, and CVD; oxidation of metals and mechanical alloying; electrophoresis and plasma processing; and mechanism and kinetics of processes.
