

PHP Programming For Affiliate Marketers

In *PHP Programming for Affiliate Marketers*, veteran Internet Marketer and Programmer John Elder (JohnElder.org) walks you step by step through the basics of learning PHP to create dynamic affiliate marketing web sites. Written for the absolute beginner, no prior programming experience is needed for this book. John starts by explaining the basics of programming in the PHP computer language, then gives you code snippets to use to do many common affiliate marketing tasks. He ends the book by walking you through the building of a complete website framework that automatically updates; showing affiliate products dynamically based on user input. If you're an affiliate marketer that wants to build your own websites and not be bound to the shackles of wordpress, this is absolutely the book for you ...before this book I had no programming experience. John makes it so easy to understand, I was writing php code in no time! I love the simple framework that John gives you in the book, I've been able to modify it and scale it out to hundreds of my own websites. Cheers!

ABOUT THE AUTHOR: John Elder is a pioneer in Internet Marketing who created one of the first Internet advertising networks back in 1997. He sold it to a publicly traded company at the height of the dot com boom and then went on to create the best-selling Submission-Spider search engine submission software that's been used by over 3 million individuals and small businesses in over 45 countries. Today John writes a daily marketing blog at MarketingFool.com that focuses on AdSense and Affiliate marketing. He also runs FlatplanetMedia.com to handle his various business projects. John graduated with honors with a degree in economics from Washington University in St. Louis where he was an arts and sciences scholar. You can contact him at JohnElder.org
