

Innovative Design and Development Practices in Aerospace and Automotive Engineering (Lecture Notes in Mechanical Engineering)

The book presents the best articles presented by researchers, academicians and industrial experts in the International Conference on Innovative Design and Development Practices in Aerospace and Automotive Engineering (I-DAD 2016). The book discusses new concept designs, analysis and manufacturing technologies, where more swing is for improved performance through specific and/or multifunctional linguistic design aspects to downsize the system, improve weight to strength ratio, fuel efficiency, better operational capability at room and elevated temperatures, reduced wear and tear, NVH aspects while balancing the challenges of beyond Euro IV/Barat Stage IV emission norms, Greenhouse effects and recyclable materials. The innovative methods discussed in the book will serve as a reference material for educational and research organizations, as well as industry, to take up challenging projects of mutual interest.

Innovative Design and Development Practices in Aerospace and Automotive Engineering. Building on our exceptional general Mechanical Engineering courses, this four-year masters degree course in Mechanical Engineering / Automotive Engineering of design and operational aspects related to modern automobile systems, from .. HH34 MEng Mechanical Engineering / Aerospace (4 years) 4R29 MEng Lecture Notes in Mechanical Engineering (LNME) publishes the latest implemented. The organizers of the 2nd International Conference on Innovative Design, . Analysis .. Practices in Aerospace and Automotive Engineering, Lecture Notes. Lecture Notes in Mechanical Engineering (LNME) publishes the latest all aspects, subfields and new challenges of mechanical engineering. Topics in the series include: Engineering Design Machinery and Machine Elements Mechanical Automotive Engineering Engine Technology Aerospace Technology and Automotive Engineering : Simulation and Validation Methods Building Research: Design, Construction and Technologies Energy Research Development Programmes Lecture Notes in Mechanical Engineering Smart Innovation, Systems and Technologies Springer Aerospace Technology SAE International, initially established as

the Society of Automotive Engineers, is a U.S.-based, globally active professional association and standards developing organization for engineering professionals in various industries. Principal emphasis is placed on transport industries such as automotive, aerospace, Out of the meeting in 1916 came a new organization, to represent engineers¹¹ results
