

Metaphysical Blueprints of Nature: How all life is emerging from the conscious expansion of space-time

Never has Nature revealed such an elegant and well-kept secret. She has taught us that consciousness, intention, and matter are inseparable; and that the three are creating and emerging together. While unrolling her blueprints to existence before us, Nature told the story of how she enfolded an algorithm into the fabric of space-time. Its a simple set of instructions guiding the Universe in spontaneous self-assembly. She went on to explain the real Big Bang was not a physical explosion that occurred long ago in outer space. But a procedure happening in real-time, one emerging from our inner space. This is the tale of existence. An ambitious story behind the mystery of consciousness, and the shape of matter. It illustrates the way in which endless worlds, in boundless space, are being sculpted by Natures divine wisdom and intelligence.
