

This is Trevor Kletz's follow up to his extremely successful *What Went Wrong? Case Histories of Process Plant Disasters*. In it, Kletz reinforces the messages in his now-classic book of famous case histories, but the majority of the book covers points not covered in the original. This new volume will focus more on procedural changes that can be made, not only at the technical or engineering levels, but at the managerial level, to prevent disasters from happening.

* This volume follows up on the cases and strategies outlined in the original million-dollar seller: *What Went Wrong** Contains many new cases and areas for improvement, including the hazards of rust, corrosion, and many more new topics* Written by the world's leading expert on industrial safety

The Life Not Lived, My Bondage And My Freedom, The Dragon in the Cockpit: How Western Aviation Concepts Conflict with Chinese Value Systems (Ashgate Studies in Human Factors for Flight Operations), College Experimenting (M/M Straight First Time), Florence Nightingale: Founder of Modern Nursing, Post-Compulsory Education for Disabled People in OECD Countries,
